

ALPINE CROSS CABIN

WORK ANYWHERE - STAY ANYWHERE

ALPINE CROSS CABIN THE MOST EXCLUSIVE VAN FOR MOBILE WORKING

A New Vehicle for a New Working Environment

In 2020, the business world changed as remote work became the 'new normal' for millions of employees. Consequently, interest in "workations" - which combine work and vacation - has increased significantly, especially within the van life community.

However, there is currently no vehicle available on the market specifically designed for this purpose. A comfortable workspace with a fast, reliable internet connection is essential for the remote worker, ensuring optimal working conditions. As a response, Alpine started developing an innovative vehicle concept that is perfectly suited for remote workers.

Work Anywhere - Stay Anywhere

The result is the Alpine Cross Cabin, a seamless crossover of functionalities for an ideal work-life balance. This new concept offers the comfort of a traditional camping van while enabling a remote office from anywhere, with a unique workspace.

The core of the vehicle concept is the Smart Table, which can be adjusted individually and is equipped with an integrated screen and keyboard. The wall trims - designed in the style of Japanese aesthetics - are made of wood with bamboo veneers, creating an inspiring work atmosphere and a cosy leisure environment. It's the perfect vehicle for remote office workers and anybody excited to go on workations to enjoy the beauty of working in nature.

X BASE VEHICLE: Ford Transit

Length: L4 (6.7m), Height: H3 (2.78m – 2.97m)	ESP/HLA/FBS	Collision Warning System
TTS-Diesel 96kW / 131 HP	Air Conditioning	Adaptive Cruise Control
6-speed Manual Transmission	Electric Windows	Lane Departure System
Rear-Wheel Drive	Quad-Beam Headlights / Fog Lights	Lane Keeping Assist
Seating Capacity including Driver: 2	eCall Emergency System	Multi-Channel Door Remote Control

X ALPINE CROSS CABIN ADDITIONAL FEATURES

Interior Design Concept: Wall-trims in Japanese bamboo design made from ultralight Queenply Multiplex material.

Workspace: Electrically extendable Smart Table with integrated 27" 4k UHD monitor, full-size PC keyboard and USB hub | 4G/LTE router for mobile work | innovative LED lighting concept | 220V and USB outlets.

X WEIGHT

3,500 kg technically permissible maximum laden mass

2,980 kg mass in running order – 2*75 kg mass of passengers - 100 kg minimum payload = 270 kg maximum permitted mass of additional equipment (for >250 kg payload = 120 kg maximum permitted mass of additional equipment)

→ Therefore, if the payload needs to be increased or the added weight of chosen additional equipment exceeds the permitted total weight, a load capacity increase of the Alpine Cross Cabin through additional air suspension is absolutely necessary!

Additional air suspension including load capacity increase certificate for Ford Transit 2014> to 3,850 kg

3,850 €
